
Glutarate and cadaverine: all 570 candidates · 50 poses per stage
A Step 1: ensemble geometry
B Step 2: ensemble geometry
C Geometry across both stages
Proximity-weighted attack angle (°)
Harmonic mean attack distance (Å; log scale)
Step 2 near-attack pose fraction
Step 1 near-attack pose fraction

rxn47618 (n=11)
target_substrate_query (n=2)
Shaded regions are pose-level reference criteria; ensemble means do not establish near-attack occupancy or enzyme activity.
